

Creative Process Digital Carbon Reduction Plan

Creative Process Digital are committed to following the government's target of Net Zero by 2050 and we are exploring the feasibility and likely timescales to achieve this goal. We are taking steps towards this goal by including ESG considerations in our decision-making processes, as well as by reducing energy consumption, waste and other causes of emissions.

Creative Process Digital recognises that its operations have an effect on the local, regional and global environment and that it can contribute towards the conservation and protection of the environment. As a consequence, Creative Process Digital is committed to continuous improvements in environmental performance and the minimisation of waste and pollution.

All staff will

- Ensure business is conducted in a manner that improves energy efficiency and seeks to eliminate waste
- Ensure that the management of existing buildings minimises the environmental impact of the energy consumed
- Undertake quarterly campaigns to increase the recycling behaviour of staff and students
- Increase the number of people commuting by walking, cycling and car sharing
